**Problem Statement** : This pandemic has made it impossible for students to physically attend schools and colleges. This has given rise to educational institutions taking online classes. But the problem arises when it's time to evaluate the students to know how much they learn in the class. The regular evaluation of students and management of scores has become difficult for schools and colleges.

**Solution:** SOME is a web-based examination system where examinations are given online through the internet using a computer system. The main goal of this online examination system is to effectively evaluate the student thoroughly through a totally automated system. This not only reduces the required time but also obtains fast and accurate results.

**Users (Students) Can**

1. Take Exams (Username & Password provided by Admin)
2. After login, Student will see the "Rules for Taking Exam"
3. After the exam is completed, you will get the results immediately and can also check the detailed result view (***You can see the answers you've selected to the questions and can also see the reason for that answer to be right.***).

**Admins Can**

1. Manage Admin Credentials
2. Manage Students (Create New, Update and Delete Existing Ones).
3. Manage Questions
4. Manage Faculties
5. Manage the Results of the Students.
6. Display the Right and Wrong Answers with Detail Reasons.
